## WORK EXPERIENCE

### Front End Developer Intern

GlobizSystems Sdh Bhd

2025 - 2025

- Built responsive, component-based UIs with React and Bootstrap, converting designs into reusable, maintainable code
- Implemented pages and dashboards; integrated RESTful APIs and managed component state/props for data-driven views.
- Used ngrok to expose local services for API testing/debugging, validating endpoints and unblocking integration faster.
- Collaborated with a Senior Web Designer to translate wireframes/brand guidelines into production-ready front-end.
- Ensured cross-browser compatibility, accessibility basics, and performance hygiene (lazy loading, asset minification).
- Coordinated with non-technical stakeholders to clarify requirements and align deliverables.
- Delivered multiple websites & dashboards: Globiz Company Website; Clinic Web System; HR System; E-commerce.
- Assisted with basic SEO setup (meta tags, semantic HTML) and performance tuning (bundle size awareness, image optimization).
- Supported deployment/hosting handoff, wrote README notes, and triaged post-launch UI bugs.
- Prepared web graphics and page assets using Photoshop/Illustrator/Canva to maintain brand consistency.

Freelance Web Developer

Self-Employed

2025 - Present

- Designed and launched a custom WordPress site for an NGO, tailored to their content and branding requirements.
- Built fully customized page layouts to match stakeholder requests, improving clarity of programs, events, and membership info.
- Implemented an online membership flow with payment through a gateway, replacing manual sign-ups and cash handling.
- Centralized membership data collection via web forms, reducing spreadsheet overhead and improving record accuracy.
- Ensured responsive design, accessibility basics, and faster loads through image compression and caching.
- Created a short handover guide to help NGO staff update pages and manage membership submissions.

Freelance Graphic Designer & Social Media Manager

Self-Employed

2025 - Present

- Managed the social presence for a startup car club, aligning content to brand and audience interests.
- Designed a custom logo and foundational visual identity assets to standardize the club’s look and feel.
- Produced image posts and short-form video (Reels) following current social trends to increase reach.
- Grew visibility to 5.7k profile views, leveraging trend-based content and timely posting.
- Implemented a content calendar and posting cadence to maintain consistency and improve engagement.
- Monitored basic analytics and iterated hashtags/captions to optimize impressions and interactions.

Content Moderator(Part-time, WFH)

Shopee Malaysia

2023 - 2024

- Monitored user-generated content (text posts, images, and videos) uploaded to the Shopee platform.
- Reviewed content for compliance with legal and platform policies; removed illegal or inappropriate materials.
- Ensured a safe and engaging environment by consistently enforcing community guidelines.

Word, PowerPoint, Excel

# Loghen Raj Manogaran

## PROJECTS

### BPO Mobile & Desktop Website (DBKL Project)

2025

Government Service Platform for Water bills and Rental

- Developed a responsive React.js web application for DBKL's property operations, focusing on mobile friendly and managing agents.
- Implemented QR scanning, dynamic data rendering from JSON, and user-friendly navigation across multiple screens.
- Optimized UI with Argon CSS and custom styling for improved usability and consistency across all pages.

### NEXTGEN Group Solutions Website

2025

Business Solution Company

- Built a brochure-style website that positions NEXTGEN as a bridge between employers and certified training providers.
- Created service pages with customized UI/UX for trainers and employers to support providers and partners.
- Organized navigation and page flow with strong CTAs to guide visitors into Mastery & Insights details.

### WEVSIG Website (NGO)

2025

Wildlife & Exotic Veterinary Special Interest Group

- Developed a responsive WordPress homepage that introduces WEVSIG's mission and drives visitors to Become a Member.
- Implemented Membership flows so users can join or renew via bank transfer (bank-in) inside WordPress—capturing payer details and proof for admin review.
- Built an admin review process to view applications, verify payments, and issue refunds when needed.

### Charisma Crystal Lighting – Chandelier Visualization Web App

2025

Local-only demo tool for showcasing custom chandeliers

- Developed a local-only web application that lets staff showcase chandeliers by placing uploaded 3D models into ready-made house environments for client demos.
- Implemented a simple 3D model upload for instant preview flow so employers can add their own chandelier models and view them directly in the browser.
- Designed a clean demo mode for in-person presentations, focusing on fast loading and smooth interaction during customer walkthroughs.
